Why have you decided to have your child evaluated by a Chiropractor?

- He/She is continuing ongoing care from another chiropractor.
- I recently had my spine checked and understand the value in getting my child checked.
- I have concerns about his/her health and I'm looking for answers.
- He/She has a specific condition and I've learned that chiropractic may be able to help.
- I want to improve my child's immune function.

Wellness Profile

The human body is designed to be healthy. The primary system in the body which coordinates health and function is the nervous system. Your nervous system is surrounded and protected by the bones of the spine, called **vertebrae**. Many of the common health challenges that adults experience have their origins during the **developmental years**, some starting at birth. Layers of damage to the spine and **nervous system** occur as a result of various **traumas, toxins and emotional stress**. The result may be misalignment to the spinal column and damage to the nervous system in a condition called **Vertebral Subluxation**. Please answer the following questions to give us a better understanding about your child's state of wellness and factors which may be contributing to vertebral subluxation and impeding your child's **ability to heal**.
